I am a guitar/piano player here in Milwaukee, and I want to teach you to play songs on guitar today! I believe that a lot of teachers make learning music boring and teach a lot of old stuff from the 1800s that nobody really wants to learn. I will teach you to play your favorite songs immediately.

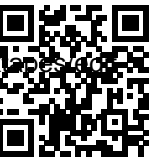

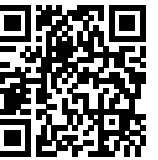

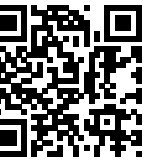

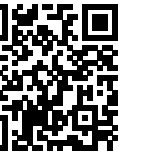

I was a scholar guitar student at Berklee College of Music and USC, and am part of an upcoming indie label here in Milwaukee/Madison. I have made a lot of music from blues, R&B/soul, pop, rock, and hip-hop. I specialize in the guitar styles of John Mayer, Jimi Hendrix, and Kurt Cobain. You can play almost any song from any of those genres on guitar, even if there is no guitar in the song, and I will teach you how.

What I teach you will make you able to learn other instruments such as piano, bass, and drums very easily, and I have these instruments if you need to use them. I can teach you in your house for convenience.

You will learn the following including:

- * Songs
- * Music theory (chords, scales)
- * Improvisation/soloing/lead guitar
- * Learning songs by ear
- * Reading chord charts
- * playing with others and lots more

I am looking forward to teaching you songs!
