ABOUT:

The RS 120 RF (Radio Frequency) Wireless Headphone lets you enjoy sound without the cumbersome cables associated with traditional headphones. This system features a lightweight on-ear headphone that receives sound from a transmitter base when connected to an analog output of any audio source (like a TV, sound system or computer). The sound quality is classic Sennheiser; detailed and balanced with good clarity and bass response. These lightweight headphones, featuring a padded headband for comfort are ideal for long listening or TV watching sessions.

This wireless headphone system comes with an easy to use recharging system. The headphones are powered with NiMH batteries (included). Once installed in the headphone ear cups, the batteries are recharged by simply placing the headphones on the transmitter base. The transmitter also features an automatic on/off circuit. It powers on when the connected audio source is activated without switches or buttons! Five minutes after the audio source is turned off, the transmitter shuts off to conserve power and battery life.

FEATURES:

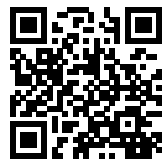

• Wireless freedom -- Interference free reception for stereo sound through walls, ceilings & outdoors up to 300 feet

recharged when stored on the metal cradle

â€¢ Long battery life -- Supplied AAA NiMH rechargeable batteries provide roughly 20 hours of operation* (*battery performance varies with use and installation environment)

â€¢ Headphone control -- Volume, on/off and tuning control located on the headphone

=====

These headphones have worked GREAT for late night sports and movie viewing. Simply plug the audio cable from the headphone charger, plug the power cord in, and the headphones work! Absolutely simple, and the sound quality is AMAZING -- full HD sound from a great German audio company. Since it's an RF signal, the signal will travel all over your house, crystal clear in my experience. No cosmetic damage at all, and the headphones work perfectly. This would be absolutely perfect for gaming, though I've only used them for TV/Netflix/Blu-Ray/Apple TV.

Listing this product at \$50 firm, cash only. Please no scammers, I don't do shipping or delivery, no checks or money orders, and the product is still under a 2-year full warranty. Looking to move this quickly!
