STEALTH FENCE AND CONSTRUCTION LLC

If you need a fence, deck, patio cover, pergola, shed or about any other carpentry work done, I'm your guy. When you want affordable quality, for your backyard wishes, I'm the guy that makes those wishes come true.

There many things I do differently that make your investment more aesthetically pleasing while adding life to your new project against this intense Colorado weather. For starters, I don't just scab on my 2x4 rails to my fence posts like I see around here. I use a 2x4 metal bracket to add strength and give it a nice flush look to your new fence. I also set my fence posts in 90 pounds of concrete and fill my concrete slightly above the dirt line with a neat taper going from the posts down to the dirt to prevent puddling water from sitting and rotting your fence posts. I often see companies fill the hole with concrete only until a couple inches below the dirt line. This creates a cup for water to surround your posts. I also offer staining and painting of your fence and deck projects to protect them from the elements. My work speaks for itself and I have basically no overhead so I keep my prices beyond affordable.

If anybody beats my prices on anything, I'll beat their price by 10%. Please feel free to call, text or email me anytime. Thanks.
