Despite of the fact that most of the piano teachers don't know what to do with the real beginners indeed, I enjoy teach beginners to watch a high progress. I have the adequate and sufficient tools to teach them such as lots of beginner's music sheets, on going teaching DVDs and books. However, I will not let my students become idle. My smart approach lead them to become disciplined players. I will teach you the seemingly complicated chord progression, theory and technical skill in a concise comprehensive way. Plus, my explanation use all kinds of interesting concepts hence it's hard to be boring. No matter what kind of stages of life you are at you will be very well trained at the beginning stage with such a little cost.
