I need an acoustic guitars that will never be played or hold tuning again to re-purpose in to a piece of art.

Damage, even bad damage, to the sound board is ok (the sound board will be removed anyway). Some damage to the back may not effect the project either. Wear marks from being played are a bonus.

I cant use any that someone has "gone Pete Townshend on", it has to be in one piece and still look like a guitar.

Thank you for your time and.
