QR Code Link to This Post My sister got married and can't keep her parakeets anymore. There is one beautiful green male and one blue female. They don't like being handled, but can be trained with time and patience. The female is a couple of years old but the male is much younger. They will come with all of their toys, perches, and a small ziplock bag of food but NOT a cage. You have to have your own cage. I'm asking for \$20 cash just so I know you won't turn around and resell them for a profit. Thank
