QR Code Link to This Post I am a photography instructor located next to Scottsdale Fashion Square and I can also come to your location. I have a photography degree and also work as a professional photographer for a living.

If you are a photography student, a hobbyist or a professional photographer that needs additional lessons and hands on workshop training please contact me. I love teaching and I will take all the necessary time to teach you the art of photography.

I can create a customized class schedules focusing in exactly what you want to learn. I teach basic, intermediate and advanced photography in addition to specialized areas such as, night photography, light painting, headshots, portraits, senior photos, photojournalism, product photography, wedding photography, new born photography, fashion photography, nature photography, macro photography and others.

My classes are on a one-on-one basis to ensure I focus on your needs. My lessons include study materials for you to review after each of my classes.

If you are interested in learning any area of photography please e-mail me or call me. I would love to help.
