QR Code Link to This Post Experienced guitarist. My influences range from caspian, TWDY, Saxon shore, Balmorreah, Tycho, Prawn....the list goes on and isn't limited to post-rock. I just wanted to test the waters and see if anyone out there has any interest in putting together a post-rock influenced collective. Would love to find another guitarist to collaborate with on weekends at first and see where it takes us. Drummers and bassists interested? Even better. Looking to make some very heavy yet melodic and spacey/ambient music. Cinematic even. Only age limitation is must be over.
