=====Well-known nationwide shipping and receiving company is looking for candidates to do loading and unloading in their warehouse for 2 weeks during the holiday season.

This is a great way to get your foot in the door with a well known industry leader.

If interested, please send resume and info by email.

We have a great opportunity in our engineering department for a Mechanical Machine Design Engineer at our Anderson, California fabrication shop location.

PRIMARY DUTIES

- Design, create, and build equipment used in wood product manufacturing.
- Effectively model mechanical concepts and create detailed designs using 3D modeling software.

- Work as a team to develop and improve lumber processing.
- Provide recommendations and inventive solutions to smooth product flow.
- Collaborate with divisions to understand local issues and develop creative solutions.
- Direct crew members in the day to day assembly of shop projects.

- Supervise and plan equipment installation, equipment upgrades and start-ups.
- Effectively handle multiple projects, timelines, and questions from crew members.
- Continuously learn and improve knowledge of industry and equipment.
- Focus on solutions rather than problems.

QUALIFICATIONS

- Degree in mechanical engineering or related field, or equivalent experience.
- 2-5 years experience in the manufacturing industry and/or machine design preferred.
- Experience with SolidWorks or 3D modeling software a required, and FEA analysis preferred.

-
- Knowledge of welding and machining, preferred.
 - Ability to thrive in an environment of trying new things and looking for a better solution.
 - Excellent written, oral and organizational skills.

HOW TO APPLY

The rate of pay for this salary position depends on experience and qualifications. If you are qualified and

would like to apply please send a cover letter and a resume by November 4th, 2016 to:

Sierra Pacific Industries
Paul Niemer, Human Resources

PO Box 496011
Redding, CA 96049-6011

We provide an excellent benefit package including a full health benefits plan with low cost premiums, both 401k Match and Retirement Contributions, and life insurance paid for by the Company.

Sierra Pacific Industries is a third generation family-owned company based in Northern California. We

own and manage nearly 1.9 million acres of timberland in California and Washington, and we are the second largest lumber producer in the United States. Sierra Pacific is committed to managing its lands in a responsible and sustainable manner to protect the environment while providing quality wood

products, renewable power for consumers, and good jobs in communities in which we operate. Sierra Pacific continues to be a company where over 4,000 crew members are proud to work at state-of-the-art facilities and others strive to become a part of our team.

As part of our safety in the workplace policy, an offer of employment is subject to a negative drug screen result. We are also proud that all Sierra Pacific facilities follow our tobacco-free policy. We verify the

social security number of all newly hired employees. Sierra Pacific is an (EOE) Equal Opportunity Employer, including those with a disability and veterans.

We are looking for a Sr. Electrical Engineer/Controls Engineer to join our growing team! This individual must be able to work independently and have experience with PLC and SCADA.

Under minimal supervision, perform electrical design work and lead project design execution in a

manufacturing environment. Plan and conduct work requiring independent judgment in the evaluation, selection, and implementation of standards, techniques, procedures, and criteria. Review specifications, prepare requests for information, attend meetings, participate in design reviews, design electrical and control panels and systems, select instruments, prepare submittal packages, and release work to purchasing and production. Provide technical support for projects in production, test, and field commissioning. Supervise the work of drafters and junior engineering staff. Work closely with project management staff to define the details of project scope, prioritize and schedule work, resolve customer issues and concerns, and coordinate project execution with other departments.

- Prepare detailed instrumentation, electrical, and control design packages for submittal including:

- o Three Line Drawings
- o Electrical Equipment Layout and Elevation Drawings
- o Schematics and Panel Wiring Diagrams
- o PLC Control Panel and IO Drawings
- o Interconnection and Loop Diagrams
- o Instrumentation Data Specification Sheets

-Conform panel submittal drawings and other work to project plans and specifications to verify enclosure size limits, NEMA rating, UL508 and NEC standards, I/O layout and quantity, fusing, CB, I/O and TB requirements, VFD issues, and communications.

-Design and select PLC and SCADA hardware and software systems, including networking and communications equipment.

-Understand the development and implementation of logic and control schemes for remote and local

operation of water and wastewater equipment.

- Produce quality work products, which meet or exceed -customer expectations, and conform to

company standards and procedures.

- Complete task assignments within established budgets and schedules provided by the project manager.

Monitor your own progress against budget and schedule.

- Work closely with the project manager to achieve project objectives and meet customer expectations.

-

Provide technical direction, serve as a point of contact or business liaison, prepare briefings for management, and assist in problem resolution specific to assigned projects.

- Provide technical support to Sales and Marketing for bids and proposals.

Landscape Designer / Architect Entry -- Intermediate Level PROFESSIONAL Needed

Are you interested in learning and building a career as a professional Landscape Designer or Landscape Architect?

Are you the right person who consistently exhibits professionalism, intelligence, a highly positive energetic attitude? Integrity, honesty and comfortable confidence with an ability and desire to learn or expand your knowledge along with ours is a must.

Experience is helpful but certainly not primary - passion to contribute, learn and grow - required

Are you looking for a career in Landscape Design / Architecture - Construction Management and are motivated to advance into a secure lucrative practice that you will grow into

and with? We are willing to invest and train the right candidate, general computer knowledge and especially the ability and desire to learn specialty software is a requirement.

Our clients depend on us; to join us we must depend on you.

Everything we do is deadline driven, you must be very dependable -- have a dependable vehicle, dress and appear appropriately and consistently on time. Communication, ability to speak and write in a

professional manner many times is how our clients experience & interact with us; therefore, this is a form of appearance.

You must be sharp, present, have the ability to listen, concentrate and contribute.

Age is unimportant -- maturity is vital.

Our practice concentration is primarily the high / middle end -- highly exclusive residential and commercial design in all applicable disciplines of landscape design,

installation & management including pools, waterscape, drought tolerance, natural resource management & recovery, landscape structures

etcetera.

This is NOT a sales position, we don't advertise, all our clients exist or are qualified and referred by other

clients. We do this by understanding we exist for and because of our clients -- this is exactly how we treat them and why we are successful. You will be working directly with clients who are reasonable but

highly demanding in terms of professional work product deadline centric expectations -- which you will

be required to meet. As part of our team you will be expected to maintain and advance our attitude toward these relationships.

If you feel you are who we describe, at any level in career development, we would like to hear from you. We are an exclusive privately held firm, we appreciate security and privacy as many of our clients do. Please send a note explaining how your interest and ours intersect along with resume (under all situations we will keep your inquiry confidential).

Please contact us soon, if this advert is up we are actively seeking you.

Thank you.

Before applying for this job, please read the description in its entirety and if you are qualified and interested, follow the directions below on how to apply.
