QR Code Link to This Post This Swiss Chalet dollhouse was built by my father. It's 36" high, 36" wide and 14" deep with 5 rooms. The outside is yellow with brown roof and balcony. It has cross buck Swiss windows, and flower boxes at each window. It's large enough for Barbie dolls. Curtain rods for all windows. I need to reattach the front door and one flower box.

It does need some mild painting repair, and trim repair if you're handy with this sort of thing. It's sturdy. My daughter played with it until she out grew it. I do not have grandchildren to pass this heirloom down to.

This would make a great Christmas present.

The kits to build this dollhouse go from \$150 to \$300. I do have some furniture that you can have also. The price is negotiable if offer is reasonable.

If interested, send email to and place "dollhouse" in the subject line as I have several items for sale on Craigslist. Thank.
