QR Code Link to This Post There are very few cat breeds I would consider to be extraordinary and, dare I say, perfect. This is one such breed. Perfect for allergies; perfect for busy lifestyles; perfect for multiple pet households; perfect for children; perfect as therapy animals; perfect for quiet homes. This is a very quiet, affectionate, and intelligent breed, born with the desire to be lap cats.

For the severe allergy sufferer, there are almost no cats they can be around. None except perhaps the Russian White. It is believed that the white likely doesn't possess the allergens within their genetic makeup called "glycoproteins". Typically, next in line would be the Russian Blue, which in most cases the normal allergy sufferer will not react. The least favored for allergies is the Russian Black, which some allergy sufferers may react to to one degree or another.

Currently available and ready to go now are the following: Russian Blue female, Russian White (one male), Russian Blue Tabby Female. There are a couple left for Christmas - 2 white males, one of them has heterochromia eyes and is polydactyl (aka Mitten Paw, Hemingway) - 1 black still available - 1 white female. The ones ready now will purr on contact and absolutely love people. Everything below applies to each one of these kittens, regardless of color or gender.

Kittens are vaccinated and de-wormed prior to leaving. They have been raised indoor, with a dog and children. They are used to both a busy, noisy household and a quiet one. They are very gentle cats. Parents are on site. Kittens are Leukemia and FIV negative, with weekly nail trimming and mild flea preventative. All adults are treated monthly with Revolution, which kills fleas, eggs, larva, and a whole host of other things.

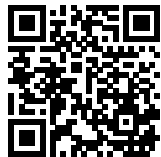

In general, this is a healthy and long living, playful and inquisitive, non-aggressive and gentle breed. They're known for their loyal, affectionate, laid back, and quiet nature. They tend to bond closely to their family and are very intelligent. The vast majority possess several dog-like tendencies.

Fee applies. They are not free. I prefer to speak with prospective owners via phone, so include a number when you.
