Hello,

I am looking to share my knowledge and help other achieve their design goals. I currently work as an engineer and am in charge of the companies product design, development, and quality control. I specialize in creating simple trouble free designs for any situation. I worked as a mechanic for several years rebuilding motors and doing some machine work. After years of hard work, I realized that I should pursue an engineering degree and let me experience be the foundation for my knowledge. I believe in simple thought through designs that provide consistent results. Using the latest technology in 3D modeling I can efficiently design and develop products while testing them for reliability.

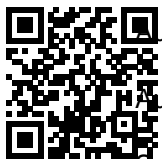

If you need help and seek consul, send me an email. I would love to know how I can help you achieve your design dream.

I am AutoCAD 2012 Certified, AutoCAD Inventor Certified, ADDA Certified Drafter, ADDA Certified designer

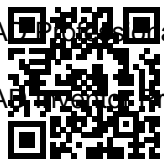

Services:

2D technical drawing adhering to ASME standards

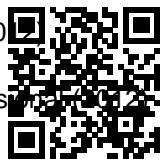

3D Modeling providing highly detailed models.
