QR Code Link to This Post Any good singers out there with recording capability? I just finished recording 12 songs that needs a good singer to help define the music. Think Queens of the Stone Age meets Chevelle at a bar then Helmet and Alice In Chains show up and have a few shots with the Foo Fighters.

These are rough mixes of the songs, it will sound way better when I really get to mixing it.

It's not a paying gig. It's for fun and being creative. I don't want to tell any artist how to perform. Let's make a great demo together. If it comes out great then we can have a discussion about selling it online and splitting the cut. Whatever happens.
