QR Code Link to This Post Yonderfeast is a social network in which users can share food with people nearby; an internet-enabled potluck platform.

At Yonderfeast

Our mission is to encourage amity, enable people to eat and reduce food waste.
 We envision a world in which we thrive on its abundance through cooperation.

How Yonderfeast works:

Registration is free of charge. Members complete a profile page that includes information such as their self summary, mission, diet, allergies and photos of themselves.

The next step is to upload a photo of a home-cooked dish, assign the dish a title, tag the cuisine and tag the ingredients.

Members seeking food can then search for other members using several parameters such as location, dishes offered, diet, language, interests, age and gender then send messages expressing their interest.

When members agree to share food their arrangement becomes publicly visible in a news-feed so other members may join them unless they choose to keep it private..
 Potlucks are consensual; the amount of people, the time, duration, location and nature are generally communicated in advance. The dishes shared are always freshly prepared and homemade.

Yondefeast will be for all foodies. Vegan? Vegetarian? Great!

The website is currently under development. However you can stay updated and signup to become a beta tester at:
