Also manual vehicles

*Remove, reinstall, rebuild, torque converter, fluid and warranty. 2 year/24000 miles.

Transmission slipping, leaking, shuddering, hard-shifting, delayed shifting, no shifting, grinding and making noises, no reverse, banging, clunking, no gears, or no overdrive? Let me help.

The torque converter is the heart of the transmission, the pump the lungs, and the valve body is the brain. Everyone, of these must be running in sync to provide the regulated pressures and timed intervals of your shifts. If any of them suffers, castotrophic failure starts to commence.

As title says transmission reconditon, repair, service, or rebuild. Dealers and auto sales professionals encouraged to inquire. Discounts on high volume. In the event I have not worked on a specific transmission, I will let you know. Will offer to get a used low mile one and bring to your location (with paperwork). Certified exact miles through the state (must be inspected by state to verify accurate and true). I do offer removal and reinstallation with the above services. Transmissions cash and carry will be provided a 2 year/24,000 mile.
