

250 TON WATER TOWER

Location **Arizona**
<https://www.genclassifieds.com/x-744845-z>

QR Code Link to This Post Removing a good working 250 ton water tower from our university library. Has normal wear but is functional and not rusted out. Was working good when we took it off line last summer. We are having a complete new chiller installed and will not be needing this anymore.

This tower is surrounded by block walls making it impossible to get a distance picture of it.

Contact me and I will be happy to answer any questions and give more details.
