pony tail, part down the middle, and a single crown braid without hair weave detection.

(Braid less Sew-In Weave) This method reduces bulkiness and allows the extensions to be placed closer to the scalp without the tension of a braid using only a needle and thread to create a strong base which to hair extensions are attached to. This method is also known as the Malaysian sew in weave.

(Partial Sew-In Weave) The perimeter of her hair is left out and the remaining hair is braided into a secure pattern in which extension are attached to the secure base to create length and fullness. This service is available in many desired lengths and textures.

(Bead Hair Extensions) Individual hair strands are attached to an extension weft with a silicon bead and clamped in place with an extension pliers utensil.

(Flip Over Method Weave) Is a versatile extension method which allows you to part the hair in the middle, left, and right without hair extension tracks being detectable creating flawless natural finish.

(Micro Bead Hair Extensions) Individual Keratin Tips and, Fusion Extensions, Quick weaves, and Bonded Weaves/ Extensions are also offered.
