QR Code Link to This Post You are a videographer/cinematographer/producer/ business owner who loves to shoot video and you have all the basic elements down: lighting, camera gripping and movement, sound, direction, editing. However, you feel you are almost always taken advantage of in the sense that no one wants to pay what you quote them. Work is slow because your marketing is flat. And you feel you are stuck in Denver when you could be filming a music video or a corporate video in Hawaii or Miami.

If that is you -- please visit www.thesuccessfulvideographer.com.

The Successful Videographer is an online video course consisting of 10 chapters that exists to change the life of a hungry and hard working videographer. Along with the videos you get a pre written contract ready to be modified and used, plus videos that have production notes for you to grow. Please watch the trailer and take a look at the contents. I guarantee you won't be.
