QR Code Link to This Post Please read add before messaging..... I bought this car at an auction with no key, towed it from Anchorage... Had it as one of my back projects and was working on other vehicles... I had it posted but didn't have a key .....someone wanted to hear it start before he made the \$600 purchase so he purchased the \$150 key. It started up and motor sounded great and it has 147k miles.. but for whatever reason the drain plug was pulled on the tranny and it won't go into gear it is a 5-speed so I think it might have to do with the the clutch or possibly the tranny.... I did however find a whole Parts rig at a junkyard as I was looking for other parts on other car and I could probably get it for around 300 to \$400 and it has every part the other car needs and it's the same color... and had som1 contact e that has a good tranny for it,,,So for about 900 to \$1,000 you can have two vehicles that you could turn into one part out the other one get your thousand back and have a free car and all you had to do was maybe a tranny swap..... Which I will end up doing myself once I get the funds.. if it doesn't sell before....even has current registration..... 600 is firm as that's what I paid at auction and I'm losing 195 after Towing it and title work.... The guy still has the key he paid 150 I'm not sure what he's willing to sell it for but I'm sure he'll sell it for a little cheaper.... Please only serious inquiries...I can get towed in the valley for 70 and 120 to Anchorage.
