QR Code Link to This Post Hello I have this amazing dresser that is over 100 years old. There are definately some wear and tear and actually this middle drawer has no bottom :-) simple fix I just never did it, I've owned her for 24 years and bought from an older woman who had it in her family. It's a super cool piece she measures 39 " wide by 32" tall by 22" deep at the deepest part. She does has a slight serpentine front. If your interested please call
