QR Code Link to This Post Copper is an orange in color male cat who is 2 years old as of August. He is neutered, not declawed. He was rescued from outside when he was a kitten. He has his first year shots and is healthy. Will provide cat food bowls, litter box, cat scratch post, toys, cat carrier and what's left of food and litter. He is very playful and energetic. He has not been around other cats and has been around a couple dogs that have been over, which he chases them. He is good with my young son, but doesn't really like to be picked up by younger kids. I have to rehome him due to allergies.

Looking for a great and loving home for.
