QR Code Link to This Post New role of 500ft in ground radio boundary wire RFA-1 for Firm at \$20

A spool of PetSafe 500 ft. Boundary Wire for In-Ground Radio Fence has enough wire to cover about 1/3 acre for your in-ground radio fence system. Simply splice the wire together using lubricating wire nuts and bury the wire 1 - 3 in. underground. Once you have run a complete loop to the in-ground radio fence transmitter you are ready to start training your dog.

500 ft. of boundary wire for underground containment systems

Covers about 1/3 acre

Can be used with any in-ground radio fence system

20-Gauge wire

PETSAFE Boundary Wire And Flag KIT PRFA-500 \$30

The PetSafe Boundary Wire and Flag Kit is needed to cover the area of containment for your radio fence. The kit includes 50 boundary flags, 500 ft. of boundary wire, 2 wire nuts and 2 waterproof gel-filled splice capsules to protect the splice from corrosion. There is enough wire to enclose approximately 1/3 of an acre. This kit may be used with either standard or deluxe radio fence kits.

For use with standard and deluxe radio fence kits

500 ft. of boundary wire

50 boundary flags

2 wire nuts and 2 waterproof gel-filled splice capsules

Covers up to 1/3 of an acre

Super Receiver and Collar RF-275-11 FIRM AT \$70

The PetSafe Stubborn Dog receiver collar is used to add another dog to the In-Ground Fence system (sold separately). This waterproof receiver collar uses a 9-Volt battery and is sized for dogs over 6 lbs. It features 4 levels of static correction adjustable to your pet's temperament, plus a long press vibration mode. This collar features our highest strength of static correction designed for Stubborn or hard to train dogs.

or dogs, cats, and more

4 levels of static correction (1-4) were used to choose what is best for you, for this or for your overall training.

Low battery indicator

## Warning tone with vibration helps train pets with hearing loss
