QR Code Link to This Post Hey, my name is Stephen, I'm 21, and I'm offering my bass services for any band that is looking for either a temporary bass player or a studio bassist. I have been playing music for awhile now and I also play guitar and piano. Mostly come from a metal background but I'm down to play punk, pop, and rock stuff too. Here is some of my music for references:

A couple of videogame covers I have made:

Also, I used to play bass for the Milwaukee metal band H1Z1. I played bass on their debut album which you can listen too here:

As much as I would like to commit to just one band full time, temporary stuff works better for me now since I work and I'm in college.

If you are interested in having me play bass, email me or send me a text.
