QR Code Link to This Post We are looking to rehome our very loving and gorgeous female Akbash guard dog. We rescued "Tesla" from the local shelter and now after 5 months she's very healthy and ready for a loving home. We do not have any history for Tesla, but we know she was at the local shelter for over a month and her previous owner's surrendered her for unknown reasons. Tesla is an "anti-social" breed, and is not a pet to take to a local farmer's market or to be kept in an apartment. Tesla, however is very loving, loyal and adores attention and being brushed! Her hearing is very keen and she is bred to protect. Her breed is also known to protect herds from wolves and other predators. Tesla is spayed and up on all her shots as well. We currently live in the city and have two other Labs, so we cannot keep Tesla due to city restrictions and grumpy neighbors.

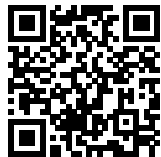

Tesla is a very unique and requires a lot of space for running and exercise. Tesla is not a small-child friendly breed, nor does she get along well with smaller dogs. Tesla loves cats and isn't bothered by them at all. Tesla currently weighs 75 lbs. and will get to approx. 80-90. She's very protective and loving and we only want the best for her. Hopefully someone out there who understands her breed and can provide her with the best loving environment. We live in Idaho Falls, Idaho and are posting this ad in Montana, Northern Idaho and other possible locations which are better suited for Tesla's breed. Small adoption fee is requested to aid with the fees we endured for her operation, vaccinations and micro-chip.

NOTE: This is our second attempt to rehome Tesla from the Craigslist site. We had a very good response from the previous attempt and communicated with some wonderful and caring people who wanted to adopt Tesla. However, we cannot emphasize enough that Tesla truly needs to be in an environment like a farm, ranch or large property, without small children and preferably without constant travel in a vehicle. Thank you to all who previously responded and showed interest with Tesla's adoption.
