QR Code Link to This Post Hi, I'm a session musician/recording engineer/producer based out of Tulsa, Ok who works over the internet to turn your rough demos into full production songs. Some of my skills include guitar, bass, keyboards, orchestral arrangements, and drum programming. I have years of experience in many genres including: rock, pop, blues, indy, psych rock, Christian/gospel, film score, classical, etc. If you are in need of either full production or session playing, drum programming, mixing, mastering, etc. contact me.

No sure how the remote recording process works?

All you have to do is send a rough demo recording (i.e. a cell phone recording) and then we can discuss what kind of production your looking for (Guitar, Drums, Bass, Organ, Synth, Strings, Horns, etc.) and I can take over from there. I'll record a fully produced professional sounding instrumental of your song and send it to you. From there all you have to do is take the track to local studio (or home studio) and record your part (vocals, guitar, etc.) on top of the track I sent you and once you are done have the studio engineer email me the tracks that you recorded and I'll mix the song into a final, radio-ready recording! Recorded. Mixed. Mastered. DONE!

Here's a link to my website: <http://www.caderobertsmusic.com>

YouTube: <https://www.youtube.com/c/ECHOMusicmaker>

If you have any more questions at all, don't hesitate to ask! I'd love to be a part of your project!

Thanks,
