QR Code Link to This Post Just cut down a tree in my backyard. The chainsaw I rented has taken a beating and it needs more HP. Length of tree is 12 feet with a girth of 16" and with the top being 12" I only need it cut up as I am putting it on the street for free firewood. If you have a great chainsaw that can cut through butter, this is easy cash for you. Looking for an estimate on about 20-22 cuts..
