QR Code Link to This Post I do lift and leveling kit install on most any truck or suv. No im not a big shop with all the lifts and name brands, but I do know the work and will not hack your truck like they will! I have no reason to rush except to get it done in a timely manner for you. Im old school floor jacks and jack stands but i have all the tools to work with to do the job right. I have specialty suspension tools and everything else. I have trucks I can show you in person that ive built as well as pictures of others. My prices range depending on if its 1/2 ton or 1 ton trucks and by what lift type your using, for instance on chevrolet independent suspension if its a bracket lift or a spindle lift price will vary some. But for most cases a Chevy 1500 would be around 400\$ a 2500hd 500\$ Leveling kits i can do for around 100-150\$ labor.. I dont mind helping you decide on the lift you buy or helping you order based on what you want. The trucks pictured are all ones Ive done. Suspension and Body lifts. The white one is my personal truck which ive put 3 different lifts on. Call or text 678409337
