QR Code Link to This Post Seeking roofer to perform tear-off on several single-story roofs and re-shingle. Prefer a contractor with a small crew who works primarily for real estate agents or investors who truly care about the work performed on their property. Individual must be licensed, willing to provide workmanship warranty, meticulous, insured and come to the table with material plus pricing for work performed. Rough carpentry skills are needed for all roof work available.

Also, have a separate need for an experienced roofer to repair roofs that must be patched to stop leakage/water damage until funding is available for tear-off and re-shingle. However, the individual must have all tools available to perform the work. Interested.
