QR Code Link to This Post Invasive tree species are a serious threat to Hawaii's ecosystem by altering the soil chemistry, making it difficult for native species to grow. Invasive forests are now taking over our native forests. Here are some of the invasive tree species found here in Hawaii:

<u>GenClassifieds.com</u>

 $\hat{a} \in \varphi$  Albizia  $\hat{a} \in \varphi$  African Tulip  $\hat{a} \in \varphi$  Miconia  $\hat{a} \in \varphi$  Gun Powder  $\hat{a} \in \varphi$  Melocia  $\hat{a} \in \varphi$  Cecropia  $\hat{a} \in \varphi$  Schefflera

Help us restore our native forests and control invasive species by calling 808 Tree Care to safely remove any invasive trees you may have on your property. Free arborist consultation.
