QR Code Link to This Post Hello!

I'm searching for a producer to assist with my current independent project. In your reply, list the instruments that you play, where you are located, and whether you have access to a recording space. I would like to create a soulful house/tribal sound so only respond with samples of your work in that genre. Please do not respond with pop or rock songs and tell me that you do all genres :) I am looking for something soulful but danceable and distinctly not pop. Copy the links below to get a sense of the vibe I'm going for. I am looking for someone who can customize music according to songs that are already written with melodies. Please include information on your fees.
