QR Code Link to This Post Truly speaking, this is the way to conceive a boy or girl.

We discovered an amazing phenomenon in women. Just like there are 2 kinds of sperms, women have two types of menstrual cycles, one suitable for conceiving a boy & the immediate next one for a girl. These gender specific cycles alternate. To get a boy, conceive in a boy cycle. To get a girl, do it in girl cycle. It's so simple now. The days of just keep trying are over. It is no more a game of chance. Don't waste time on gimmicks like gender diets, acidic / alkaline douching or any astrologer.

We are also the first one to understand why some couples have multiple babies of same gender. That couple gets easily conceived in one type of cycle. If you got 2 babies of same gender, chances of 3rd baby to be of the same gender are actually higher. PreGender Preconception test is THE ONLY WAY to guide you when to try and when to avoid to get the baby of desired gender.

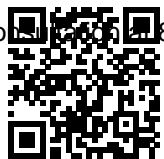

We test two urine samples, collected from two consecutive menstrual cycles, to see from where to start. Thereafter we keep on advising when to try and when to avoid, without charging any additional fee. We sincerely want to help get the baby you want. If 100 couples use our PreGender test to conceive, say a boy, and if all of them conceive in a boy cycle, 92 of them are already getting boys. Same is true for girls. No other company has that kind of success rate. If a company claims higher success rate, without testing anything from you, that is probably fraudulent and that effort will go waste.

We are also the earliest in the world to find the gender of your baby by testing urine sample, starting as early as four days before the expected period date. Urine samples can be safely and legally mailed through couriers from any country under 'exempt human specimen' classification.

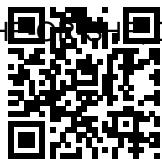

We are proud to have two four patents on this technology and are looking for financial partner to develop a test strip. We are 25 years ahead in this field. Please don't consult your physician about it. They can only laugh at this time.
