QR Code Link to This Post Volunteers will contribute to the quality of life of the elders by supporting them in a variety of therapeutic, social, and physical programs and special events. Activities include art, horticultural therapy, music therapy, exercise programs and seasonal/theme parties. Volunteers with musical interests are encouraged to bring their instrument. We also have several pianos on site.

Volunteers will work with residents in both one-to-one and group settings. There will be structured activities and a daily schedule of events but volunteers are also expected to be motivated, independent, and to make effective use of their unscheduled time. A typical day might include: making a collage, leading a discussion group, putting up party decorations, playing cards, and taking residents out for walks. Over the course of the summer there will also be various outings such as scenic drives, picnics, and visits to the aquarium and/or art gallery.

All volunteers are expected to be creative, flexible, respectful and responsive to the residents' needs. The benefits to volunteering at this project are immeasurable. We are offering volunteers an amazing opportunity to develop relationships with interesting and loving seniors. The volunteers who have a person-centered approach to their volunteerism and who are looking for these personal connections are the ones that will benefit the most from this experience.

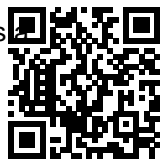

Project dates:

June 3 - June 23, 2018
 June 24 - July 14, 2018
 July 15 - August 4, 2018
 August 5 - August 25, 2018
