QR Code Link to This Post I am a rock producer and audio engineer in New Orleans. I put together a 12 song collection of Rap, Hip Hop for a young artist and the partnership did not work out. I still own all rights and now want to sell the instrumental tracks to an artist who can use them. Just add vocals and instant CD collection ready for sale. These are professional recordings mastered with the latest technology and have a more "uptown", R&B crossover feel than most first time Hip Hop releases.

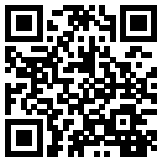

Here is a link to listen to short samples of the songs:

<https://www.youtube.com/watch?v=XWugDSnTczE>

I am an affiliated BMI writer and participate with.
