QR Code Link to This Post The seasonal weather is growing colder and the pests are moving in to avoid it. You are probably spending a lot more time inside and might notice all kinds of critters living with you. It is also time to treat for the upcoming holidays to keep your guests comfortable.

I operate a full service, licensed, and insured, pest and termite control company.

I appreciate that your money is made by hard work and make every effort to give you value with my service. I spend time getting to know your family or business and pest concerns. I then come up with a comprehensive plan to treat the pest(s) you are experiencing.

I use integrated pest management to limit the amount of chemicals in your environment and the amount of risk for you, your loved ones, and your co-workers.

After the initial treatment I can generally control the insects from the outside with quarterly (4 times a year) treatments. On each visit I sweep down all the spider webs and make your house look quite tidy. I also treat the foundation of your dwelling by spraying an area 3 foot up and 3 foot out as an outside barrier that makes insects very unhappy to be near your house.

I will also assess your home for moisture and termite issues if you wish.

Cockroaches, spiders, hornets, wasps, crickets, silverfish, earwigs, stink bugs, millipedes, centipedes, fleas, ticks, ants, and more.

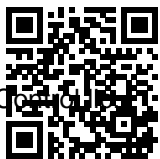

I look forward to talking with you,

Scott W
