QR Code Link to This Post My family's brown tabby cat is still missing. Her name is Tikki and she went missing around May 2017. Her usual hang out was in The Terraces and The Club apartments.

She is microchipped! She had lost her collar a week prior to her disappearance, so I believe someone may have taken her in as she is somewhat friendly.

She is just a regular small sized brown tabby, but she does have noticeable belly flab which can be seen when she's walking. She will go up to people for attention, but she will start growling if she gets picked up.

I know she has been missing for a while now, but my family still has not given up searching for her so any help is.
