QR Code Link to This Post Hi there! Thank you for viewing my ad. My name is Chris, I have been a computer tech for over 15 years now, for the last 6 years I have been repairing computers for the many Craigslist users. I have worked on computers for as long as I can remember, since I was a small child. Throughout school I worked on my friends and teacher's computers, and right out of school I worked for Best Buy's computer dept. and many businesses around town. I have set up tanning salons, doctor's offices, studio's, and much more.

Whether your problem is a minor issue like a virus or software issue, or you are having major hardware failure or you need a home or office networked, I can take care of it! If you bring your computer to me, you will pay only \$40 for my labor, no matter what the problem is! Whether it takes me two minutes or ten hours!

I work on PC and Mac computers, desktops and laptops. Hardware or software, it makes no difference.

I get most of my work from my repeat customers and their referrals. I appreciate the chance to become your new computer tech! I guarantee all my work, and stand behind whatever I do. I have even been featured on KTLA's morning news for my services.

If you have any questions or you would like me to repair your computer you can reach me at: 818-478-1401 I work seven days a week and can usually see you anytime. My office is located in Burbank right next to the Burbank Mall.

Thanks again, I hope to hear from you!
