QR Code Link to This Post Seeking someone with high-level experience in sampling and hip-hop production. Tastes: Dilla, neo-soul, Flying Lotus, Hiatus Kaiyote, Tame Impala.

Below, I'll outline the 1-2 day project. Please respond with your rate, availabilities, and tracks you've sampled/produced.

- THE GIG -

Recently, I purchased the electronic drum triggers by Sunhouse called Sensory Percussion (<http://sunhou.se/>). I've already set them up to working order, however I'm not satisfied by the sounds I'm getting.

I'm seeking help,

- Navigating the Sensory Percussion software (I'll provide the manual ahead of time)
- Mixing (within the software) the samples provided by Sunhouse
- Finding dope samples to use for this electronic drum kit
- Creating a great drum kit library
- Integrating Sensory Percussion into a hip-hop production workflow (w/ Ableton or Logic Pro X)

I'm excited to utilize your wisdom and time to make a breakthrough in my setup!

Cheers,
