QR Code Link to This Post We have 2 female lab puppies ,possibly 3or4 months old, that we found on the side of the road, starving and covered in ticks.We have had them for about a month getting them healthy and happy. Now they are ready to find homes were there new parent will take care of them and show them not everyone will mistreat them! There is one all black female, one black with white chest. I don't believe they have had any shots, and none are fixed. I am asking \$25 for a rehome fee to try to get back the cost of dog food and deworming meds, and flea meds. PS....They are very friendly and they love dogs and people ,and.
