QR Code Link to This Post This sale is for a dual beam light bar. I installed new H3 35w light bulbs. The running lights are operational. The turn lights do not come on. It may just be bulbs. I did remove the lenses and the left lens shows it had water entry and the reflector area is deteriorated. The only numbers I could find were located under the running/turn bulb reflectors and they have a Suzuki part number 35600-49 that relates to the running/turn assembly only. The bar's mounting holes are approximately 3.5" on center and the overall length is approximately 23". This light bar would work with numerous motorcycles. Check out the photos and contact me if interested at eight six zero nine one six one eight seven.
