QR Code Link to This Post Rated GQ's Best Stuff

The first innovative low maintenance belt drive bicycle for the recreational rider, designed to make cycling simple.

Designed to be free from routine maintenance, this belt driven bicycle is the award-winning, Kickstarter darling that raised over \$500,000 in its launch campaign. It features a rust and grease free belt drive, a versatile three speed shifting system, and an ultralight rust proof frame weighing only as much as a few bags of groceries (25lbs).

Retails for \$449 which is what I bought it for. Like new as you can tell from the pictures.
