

Did the city put a STOP WORK ORDER or 'RED TAG' on your potential buyer or sellers property for not submitting plans and pulling the proper permits and now it's holding up your deal? Have they filed a lien on the property?

We'll get the violations resolved, get plans drawn and approved, pull the proper permits, get the job done, get your inspections and approvals and a certificate of occupancy so your deal can move forward. Then we go back and attempt to negotiate the fines and any associated liens.

For a free confidential consultation, please feel free to call me direct at during normal business hours. Give me 10 minutes and lets see if we can get you sorted. More information at our website including client list and references. www.coastaldon.com
