QR Code Link to This Post Thanks for checking out my proposal!

I am looking for a photographer that has a strong skill set to take green screen photos and digitally impose a backdrop. I have the backdrops that I want used.

Must be able to take the photos and integrate seamlessly. I am looking for someone with experience in this medium. I do have green screen backdrop, photography lights and shooting space. I am also open to coming in to your studio, whatever best works!

Would like to do this shoot ASAP.

Please respond only if you have the skill set to not only photograph high quality but to impose into background.
