QR Code Link to This Post When I was looking for a Jeep, I found this 2008 H3, Alpha luxury edition and fell in love with it. It was advertised as a Jeep on Steroids, and I agree. This is one of the few Alpha models with 5.3L, 300 hp, heavy duty transmission. The top lights are factory installed. The bright white paint and exterior chrome look sharp with the tan and black interior. This H3 has always been garage kept and well maintained. It has heated seats, a spacious interior, rubber floor mats, sunroof, programmable garage door opener, and very comfortable seats. This vehicle looks and drives like a new vehicle. Has new Master Craft tires and a radiator installed last month. My job will require a lot of travelling next year, and I have bought a vehicle with better gas mileage. This is a good one! Priced \$500 below book.
