QR Code Link to This Post 1990-1993 Acura Integra Throttlebody

From the B18A engine
Stock diameter: 58mm

*This will work perfectly as a factory replacement for a B18A or a JDM B16A from an Integra XSI or Civic/CRX SIR

*This will work as a performance upgrade on a D-series engines (most D-series are 55-56mm)

Condition: Used. Has about 187,000 miles on it. No issues whatsoever. I also drilled out the rivets of the TPS once so that in the future I could transfer it to an aftermarket throttlebody. I ended up just doing an engine swap and I never needed.
