QR Code Link to This Post Have you ever noticed how Plumbing contractors never put their company name on their work, this is something that electrical and HVAC contractors have done for many years. I believe it's because there is not enough skilled non-union licensed plumbers who are confident in their abilities and their work. My name is Sylvester Johnson, Master plumber of 15 years and over 27 years experience in the commercial and residential Plumbing industry. I am the owner of Precision Plumbing STL, we are a licensed bonded and insured Full Service Plumbing Company that provides plumbing services for commercial and residential. We are now a four-man shop but we still have low overhead cost, which saves our customers money. We offer flat rate upfront pricing on all of our work, and our work is always done right the first time. There are many plumbers in St.Louis that contract work with customers and then attempt to hire a master plumber to secure a plumbing permit for them, this puts you the customer at risk, all of our work is warranted for one year and at the completion of each job I personally label our work with our company name and logo to identify quality and craftsmanship. We also secured our own Plumbing permits for St Louis city and county, So enclosing on your next Plumbing project, rehab, rental property, commercial property, apartment unit plumbing repairs, or new construction, please consider giving us a call. we are here to serve you.

Sylvester Johnson jr. Lic # P8445 & 220 always ask for a
