I have created a toothpaste kit which contains ingredients which not only have powerful antimicrobial, antifungal, and antibiotic properties (think thrush or mouth sores) but increases blood oxygen levels by 300% which is equivalent to performing Pranayama Yoga for two hours.

With such an increase of oxygen deep increases in cognitive abilities are experienced and I can say from experience the benefits are pronounced.

The main ingredient is a nut related to the almond called haritaki (terminalia chebula). It is grown in the Himalayas and is the most powerful foodstuff in Aryuveda. Optimizing 48 bodily systems from blood glucose utilization to blood pressure it greatly increases production of Glutathione Peroxidase which greatly increases blood detoxification.

The toothpaste also contains turmeric, probiotic bacteria, fructooligosaccharides to promote healthy bacterial colonization, as well as Ashwaganda.

And I want to give you the recipe.

A kit containing the toothpaste, homemade mouthwash, a white and blue rose, 35 haritaki capsules and documentation can be sold for 10 or 20 dollars with half of the revenue kept by whomever sells the kit and the other half used to fund the process of ending homelessness forever.

Please call me at . I would like to meet to give you this recipe as well as share with you other plans I have to end this scourge once and for all.
