QR Code Link to This Post I'm considering purchasing an old self-propelled detassling machine, the kind that kids rode on to detassle. I am wanting to convert it to interseeding machine to drop cover crop seeds into tall corn. What do you have sitting in the fence row? The price I'm willing to pay is dependant upon condition, motor, and tires, but will consider just a frame if you have one. Please text or email and include pictures if.
