QR Code Link to This Post 65 years of proven results. There is no better time from now to December to use Bio-Liquid Calcium that has been proven to work longer, faster more effectively and is cheaper than lime. Our program no waiting time it goes to work immediately raising your soil pH and has a three year soil life. Lime is a very raw and impure way of adjusting soil pH levels. Liquid calcium works the same way as lime does by using calcium to displace the hydrogen ion in the soil to raise the pH, however; the difference is that liquid calcium delivers the needed calcium to the soil in a pure and concentrated form, causing it to work faster and more effectively without the pollutants of crushed limestone.

Bio-Active Liquid Calcium +BioActivator (which is a combination of 52 essential trace minerals,high carbon energy) it's is the modern and easy way to apply 100% available calcium. It works within 35 minutes of application to supply needed calcium, required trace minerals, Special formulated 12% slow release nitrogen and carbon energy for maximum growth of your ROW CROPS, PASTURES AND FOOD PLOTS, To adjust the the pH by increasing calcium saturation levels.

Rob,we really like the BioLiquid Calcium and BioActivator. Our hay fields have a 15% to 20% increase in hay. And you said the weeds would go away, they did. One field we had was full of milk weed, but this year after applying liquid Calcium, no milkweed. I need more product for the second cutting. We love it. David Mc Pa 2017

Why apply lime that takes 9to11 months to start working and cost more when you can apply ProCal and start changing you soil p-H immediately.

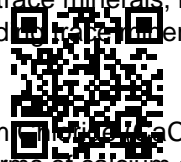

Our wheat rye oats and millet BioActivator program has proven to deliver 22% to 40 % incrsease in bushels per acre. It also inhibits fungus, mildew, leaf rust, spot bloch.spetoria, root rot...

Bio-Active Liquid Calcium is the modern and easy way to apply calcium, required trace minerals, nitrogen and energy on your for bing up your soil pH and calcium saturation levels. It works within 35 minutes of application to supply needed calcium, required trace minerals, Special formulated 12% slow release nitrogen and carbon energy for maximum growth of your ROW CROPS, PASTURES AND FOOD PLOTS, To adjust the the pH by increasing calcium saturation levels.

BioLiquid Calcium and BioActivator is FOLIAR also and IS 100% AVAILABLE TO THE PLANT AND GOES IN 6X FASTER TO DEVELOP THE CELL STRUCTURE AND raised the SOIL pH. BioLiquid Calcium is very effective applies foliar .

Hay and pasture

If your having weed problems then your soil may have low pH, BioLiquid Calcium can help solve this problem by raising the pH.

Rob, My pecan, and orchard grass fields no longer have broom sage or weeds. The hay was so thick I had trouble cutting it. That's why I need some more liquid calcium for my Bermuda field it just doesn't look good. I don't want just the liquid Calcium I want it loaded with the BioActivator. Robert T Ar 2017

Well Rob, you said this would get rid of my broom straw weeds and bring up my soil pH, it did just what you said it would on 10 acres so I am ordering 110 gal to use on my other fields. I want to try your BioActivator next. Martin T 2016

Jonathan, those two totes of liquid Calcium I bought from you did wonders on my pastures. I haven't ever seen anything like it. My neighbors keep asking me what in the world did I do to my pastures and fields, it completely killed all my weeds. This is the best hay I have every had. My friends and neighbors will be calling you, I am telling everyone. Charles S Tn 2017

Boost your cover crop growth while adjusting that soil pH.

Prepare that ground for your wheat, rye and oat growth.;

TimB NC 2016 : "Rob, sprayed BioActivator and Liquid calcium on my beans 3 weeks ago, I can already tell the difference, they look so different from the other beans. I am going to use it on everything next year. "

Why use tons of lime on your fields that won't be available to your soil or plant for six to eleven months or more when you can use 3 gal of Bio-Active Liquid Calcium per acre which is 100% available after being applied.

"I have been using Clean Green Ag's products for several years now and the results have been outstanding. My yields are consistently better than all my neighbors and I spend less on my fertilizer than they do!" -Larry Aesoph, SD

Rob, that Liquid calcium and BioActivator is great. I am a believer now. My Beans did fantastic even my poor fields almost did as good as my best fields. I'll be buying again this spring. Bill B MO. 2016

Texas Agricultural Extension, Texas, A & M University System.

"The increased ammonium absorption caused by calcium has interesting results. Photosynthesis increases and greater amounts of carbon dioxide are captured by the plant from the air, which increases the plant's organic building blocks...."

Add our BioActivator to your winter program. Users have seen up to a 45% increase in production.

Our BioActivator and high carbon treated Soybeans simply out-performed our commercial fertilized fields. -IA Farmer

For only \$9.50 an acre I used BioActivator and grew phenomenal wheat! - Kansas Farmer

This product is going to revolutionize farming. - Georgia Extension Agent

We saved over 50% on the cost of fertilizers on our crops by using Liquid calcium - Nebraska Farmer
University research has proven Liquid Calcium, causes the nutrients in your soil to be 44% more available to your plants
Cut your nitrogen requirements by 50%.

FOODPLOT

We used the liquid calcium on our food plots over two months ago and did not get rain Till just recently even after the turkeys and dove had there way with our seed to our amazement a good amount of what we planted still came up not long after it rained

Thanks Robert Taylor 2016
