QR Code Link to This Post Hey fellow musicians, love working with guitars, I have made this hobby into a side business of sorts, KC&H custom guitars. I have put together Franken guitars, kit guitars, built custom guitars and refinished a bunch if guitars. I am really wanting to focus on custom builds and finish work but message me or call me with your project and let's see what we can build together.I am working hard to build a good name in guitars around Saint Louis please check out my facebook page and read the reviews.

check out the uploaded pictures and my Facebook/Instagram page @kchcustomguitars to see all of my work. You can also check out what I am doing by searching for me on YouTube, I have started a channel of tutorials about guitar refinishing and repairing.

November 18th my wife and I are hosting an event at pub 231 in south county where one of my guitars will be raffled off and the custom guitar I am building for my son's elementary should get some play time as well.

tags: custom, nitrocellulose, strat, telecaster, les paul, Fender, Gibson, guitars, project, guitar,.
