QR Code Link to This Post We need someone who would love to occasionally play rock and blues rock with a 3 piece band. We do this for fun, so no pros needed unless you just want to play. We need a key and piano player as opposed to just a piano player. Ability to sing harmony is highly valued. Just looking for a key player with a good attitude that likes and knows this kind of music. I have three bands here and most players have been with me over 5 years, some 10 years.

We have a two keyboard setup (Nord Electro 3 and Yamaha MX 61) so we are looking for someone who can play both at the same time if necessary and knows how to dial in the right settings. We play Lou Reed, Allman Brothers, Stones, Grateful Dead, Dylan, Warren Zevon, Alejandro Escovedo, Springsteen, Albert Collins, Pink Floyd, Clash, the Band, Johnny Rivers, Dire Straits, Neil Young, Presley, John Hiatt, among others. We play in my studio, so we don't have any studio rental fees.

The opportunities to play usually come with not too much notice. So if that isn't a problem and you are interested, let me know

1. how long you have been playing?
2. what kind of music you have been playing / what kind of bands you been playing with?

Please also send a mp3 or a youtube or if you have it.
